

Apex Brains Academy — Franchise Portal Walkthrough

Audience: Internal team (client demo)

Portal: Franchise (Branch / Franchise Admin)

URL: `/franchise/login`

Theme: Franchise blue `#1A73E8`

1. Before the Demo — Checklist

Item	Action
Live URL ready	<code>https://apex.talktonitesh.com/franchise/login</code>
Demo data seeded	On the server: <code>php artisan db:seed --class=FranchiseWalkthroughSeeder --force</code> (idempotent — safe to re-run)
Browser cache	Hard-refresh (Ctrl+Shift+R) to avoid stale-asset / 419 issues
Login ready	<code>kothrud@apexbrains.in</code> / <code>password</code> (Franchise Admin — Kothrud branch)
Logo uploaded	Confirm the academy logo shows on the login screen, header, and receipts
Tabs pre-loaded	Keep the demo flow screens open for a smooth screen-share

Talking point: Apex Brains is a **multi-tenant abacus coaching platform** with four portals — Admin (head office), **Franchise (branch)**, Student, and External (competition-only). Today we are showing the **Franchise portal**: what a branch owner uses day-to-day to run their center. A franchise only ever sees **its own** students and data.

2. Login

- Go to `/franchise/login`.
- Show the branded login screen (academy logo, franchise **blue** theme).
- Log in as `kothrud@apexbrains.in`.
- Talking point:** Each portal has its own login, theme colour, and access rules. Login is rate-limited (6 attempts/min). A franchise account is **created automatically by head office** the moment the branch is approved in the Admin portal.

3. What the Franchise Owns vs. What Head Office Controls

Set this expectation up front — it explains why some things are view-only.

Area	Who manages it
Students (admissions, profiles, levels)	Franchise
Fees & Payments (record, receipts, reminders)	Franchise
Class Practice (run audio/display sessions)	Franchise
Competitions — student registrations	Franchise
Certificates, Promotions, Reports, Notifications	Franchise
Question Bank, Practice Papers, Competition Papers	Head Office (Admin)
Exams (the papers themselves)	Head Office (Admin) — franchise monitors results only

Talking point: "Content is authored once at head office for consistency across the whole network; the franchise focuses on running the center — admissions, fees, daily practice, and tracking student progress."

4. Demo Flow — Screen by Screen

Walk the client down the sidebar **top to bottom**. For each screen, show the data, then call out one or two highlights.

4.1 Dashboard (</franchise>)

The branch landing screen — a snapshot of this center.

- KPI cards (students, fees collected, outstanding, performance) and quick activity.
- **Talking point:** "Everything here is scoped to this one branch — the owner never sees another franchise's data."

4.2 Students (</franchise/students>)

The heart of the franchise — admissions and student management.

- List with search and Internal/External filters; each row links to a full student profile.
- **Add Student** — full admission form (student details, level, parent/guardian, login credentials). Internal vs. External student types.
- **Bulk Import** — onboard many students at once from a CSV/Excel template.
- Open a student → tabs for profile, parents, **Class Practice** history, etc.
- **Talking point:** "Admissions happen here. Registering a student also creates their parent record and the student's own login."

4.3 Fees (</franchise/fees>)

Monthly fee collection and tracking.

- KPI strip: Collected, Outstanding, Overdue, Collection Rate (vs. previous month).
- Tabs: **All / Paid / Pending / Partial / Overdue**; filter by month and student type.
- **Record Payment** (</franchise/fees/record>) — pick a student, choose which fee to pay, auto-fills the outstanding amount, select mode (Cash / UPI / Card / Cheque / Bank Transfer), then **Record and Generate Receipt**.
- The **Receipt** shows the academy logo, a unique receipt number, the **fee type** (e.g. Monthly / Competition Registration), amount in words, and a **verification QR**. Buttons: **Download PDF**, **Share WhatsApp**, **Print Receipt** (prints just the receipt). The QR and logo render correctly on the downloaded PDF as well as on screen.
- **Reminders** (</franchise/fees/reminders>) — outstanding fees prioritised by how overdue they are; one-click **WhatsApp** reminder to the parent (opens WhatsApp with a pre-filled message).
- **Talking point:** "From admission to a GST-style printable/PDF receipt with a QR code, the whole fee cycle is in one place. Reminders go to parents over WhatsApp."

4.4 Exams (/franchise/exams) — view only

- A read-only list of exams scheduled by head office, with **monitoring** of this branch's own students' attempts (pass counts, average score, recent attempts).
- **Talking point:** "Exam papers are set centrally for fairness; the franchise watches how its students perform but can't alter the paper."

4.5 Class Practice (/franchise/class-practice)

The franchise's signature in-class tool — an audio/display practice session for the whole class.

- **Sessions** tab — past and current practice sessions with results.
- **New session** — pick a level, number of questions, time per question, and audio dictation; the system pulls questions and launches an in-class **flashcard player** (term-by-term flash-anzan) for the projector. Students write answers in their workbook; the teacher reveals the answer at the end.
- **Practice Papers** tab — ready-made, **level-wise practice papers authored by head office**; **Attempt** launches the same flashcard player, and **Download Answer PDF** gives the answer key.
- **Answer key at the end** — when a session finishes, the **full answer key is shown automatically** (numbered grid of correct answers) both on the projector end screen and on the session results page, so students can match it against the answers they wrote in their workbook.
- **Talking point:** "This is the daily classroom experience — the teacher projects questions, the class solves on their abacus, and the answer key appears at the end for instant self-checking. The papers come straight from head office, so every branch teaches the same material."

4.6 Competitions (/franchise/competitions)

- Competitions announced by head office; the franchise **registers its students** to participate.
- Each competition card lists **who is registered** — student name, internal/external, registration date, and payment status — so the owner can see exactly which students are entered in which competition.
- The same registrations also appear on each student's profile under the **Competition Registrations** tab.
- **Talking point:** "Head office runs the competition; the branch enrolls its students from here — and can see at a glance which student is registered for which competition."

4.7 Certificates (/franchise/certificates)

- Generate and manage student certificates with a live preview and a verification QR; download as a branded single-page PDF; mark as sent.
- **Internal students** get a **Level Completion / Merit / Excellence** certificate (with the level badge). **External (competition) students** get a **Certificate of Participation** tied to a specific competition (competition name + date) — the form switches automatically based on the student type.
- **Talking point:** "Branded, verifiable certificates — internal students get level-completion certificates, competition students get participation certificates, and each one carries a QR a parent can scan to confirm it's genuine."

4.8 Promotions (/franchise/promotions)

- Students who **passed the exam for their current level** appear as eligible. Promote a student individually with the per-row **Promote** → **next level** button, or use **Batch Promote All** to advance every eligible student at once. Each promotion is recorded in the student's progress history.
- **Guardrail:** the system **blocks promotion** of any student who has not passed their current level's exam — so no one is advanced by mistake.
- **Talking point:** "When a student clears their level exam, the owner promotes them here — one at a time or in bulk — and the learning ladder moves up. A student can't be promoted until they've actually passed the exam."

4.9 Reports (/franchise/reports)

- Branch and per-student progress reports; export to Excel, and download a per-student PDF.
- Filter by **All / Internal / External**, and every row shows the student **Type** so internal and external students are clearly distinguished.
- **Talking point:** "Shareable progress reports for parent meetings and the owner's own review — clearly separated by internal vs. competition students."

4.10 Parent Directory (/franchise/parents)

- A consolidated directory of all parents/guardians for the branch with their contact details.

4.11 Notifications (/franchise/notifications)

- Compose a message to **All Students / by Level / an Individual**, using ready-made **templates** (Exam Result, Fee Reminder, Achievement, etc.). The message preview and recipient count update live; every message is recorded in the student's notification history.
- **Talking point:** "Quick, templated parent communication." *(See limitations below — automatic WhatsApp/SMS delivery is the next phase; today messages are logged to each student's history.)*

4.12 Help Guide & Profile

- **Help Guide** — in-portal reference for the owner.
- **My Profile** — the franchise's own details and password.

5. Highlights to Emphasise

- **Strict data isolation** — a franchise only ever sees its own students, fees, and reports (multi-tenant by design).
- **End-to-end fee cycle** — admission → record payment → branded PDF receipt with fee type + verification QR → WhatsApp reminders.
- **Consistent curriculum** — Question Bank, Practice Papers, Competition Papers, and Exams are authored by head office, so every branch teaches and tests identically.
- **Classroom-ready Class Practice** — projector flashcard player with head-office practice papers and an automatic end-of-session answer key for self-checking.
- **Verifiable certificates** — branded, QR-verifiable, one-click PDF; level-completion for internal students, participation for competition students.
- **Exam-gated promotions** — students advance only after passing their level exam, individually or in bulk.

6. Known Limitations (be upfront)

Item	Status
Notification Center "Send WhatsApp/SMS" (bulk)	Logged, not yet delivered. Messages are recorded in each student's history; automatic gateway delivery (WhatsApp Business / SMS) is the next phase.
Fee reminder & receipt WhatsApp buttons	Working — these open WhatsApp with a pre-filled message (deep link).
External-student competition exam-taking	Uses the practice flow for now (external students are competition-only, no level) — a planned follow-up.

7. Demo Data Reference (what's seeded)

The **FranchiseWalkthroughSeeder** populates the **Kothrud** branch with identifiable demo records:

Data	Detail
Students (internal)	5 demo students (KTD-DEMO-*) + their parents
Student (external)	One competition-only student KTD-EXT-DEMO-1 (Priya Nair) + parent
Fees	Current-month fees — a mix of paid / pending / overdue , plus a Competition Registration fee for the external student
Payment	One recorded payment, receipt KTD-2026-DEM01 (open it to show the PDF + print)
Competition	One competition (Apex Abacus Championship — Demo) with the external student registered (paid / confirmed)
Certificate (internal)	One level-completion certificate (KTD-CERT-DEMO-1)
Certificate (external)	One Participation certificate (KTD-CERT-PART-1) tied to the demo competition
Class Practice	One completed session (KTDEMO) with results
Exam	One demo exam + a passed attempt → drives the Promotions screen

Re-running the seeder is safe (idempotent). Demo records are prefixed/identifiable so they can be cleaned up after the demo if needed.

8. Next Step

Once the client approves the Franchise portal, we move on to the **Student Portal** walkthrough.

Apex Brains Academy — Franchise Portal reference for the internal demo team.
