

Apex Brains Academy — Admin Portal Walkthrough

Audience: Internal team (client demo)

Date: 29 May 2026 (demo: next day)

Portal: Admin (Super Admin)

URL: `/admin/login`

1. Before the Demo — Checklist

Item	Action
Server running	<code>php artisan serve --port=8000</code> (or live Hostinger URL)
Database seeded	Run <code>php artisan migrate:fresh --seed</code> so demo data + charts show
Browser cache	Hard-refresh (Ctrl+Shift+R) to avoid 419 / stale-asset issues
Login ready	<code>admin@apexbrains.in</code> / <code>password</code> (Super Admin)
Logo uploaded	Confirm the academy logo shows on the login screen + header
Tabs open	Keep the demo flow tabs pre-loaded for a smooth screen-share

Talking point: Apex Brains is a **multi-tenant abacus coaching platform** with 4 portals — Admin, Franchise, Student, and External (competition-only). Today we're showing the **Admin (head-office) portal**, which controls the entire network.

2. Login

- Go to `/admin/login`.
- Show the branded login screen (academy logo, dark-navy admin theme `#1A2332`).
- Log in as `admin@apexbrains.in`.
- Talking point:** Login is rate-limited (6 attempts/min) for security. Each portal has its own login and theme color — Admin is dark navy, Franchise blue, Student green.

3. Demo Flow — Screen by Screen

Walk the client through the sidebar **top to bottom**. For each screen, show the data, then call out one or two highlights.

3.1 Dashboard (`/admin`)

The landing screen — a global view of the whole network.

- 4 KPI cards:** Total Students, Active Franchises (with pending-approval count), Monthly Revenue (₹), Global Average Score.
- Charts:** Monthly Revenue Trend (line), Students by Level (donut), Branch Performance (bar).
- Franchise Overview table:** every branch with students, revenue, avg score, status, and quick View/Edit links.
- Export CSV** button (top right) for the full dashboard snapshot.
- Talking point:** "One glance tells head office how the entire network is performing this month."

3.2 Franchises (`/admin/franchises`)

Manage every branch in the network.

- List of all franchises with status badges.
- **Approval Queue** — new franchise applications waiting for head-office approval (Approve / Reject / Suspend).
- **Performance** view — compare branches side by side.
- Create / Edit / View a franchise. Approving a franchise **auto-creates its login account**.
- **Talking point:** "Head office onboards a new center here; the moment it's approved, the franchise owner can log in to their own portal."

3.3 Question Bank (</admin/questions>)

Central repository of all exam/practice questions.

- Browse, create, edit questions; Approve / Reject workflow for quality control.
- **Audio Question Generator** (</admin/questions/audio/generate>) — generates spoken-number audio questions for abacus listening practice. **Admin-only** feature.
- **PDF Upload & OCR** (</admin/pdf-uploads>) — upload question PDFs and extract questions automatically.
- **Talking point:** "Questions are created once at head office and flow down to every franchise and student — consistent curriculum across the network. The audio generator is unique to head office."

3.4 Curriculum / Levels (</admin/levels>)

- Define the abacus levels (the learning ladder) and what each contains.
- **Talking point:** "This is the master curriculum every student progresses through."

3.5 Resources (</admin/resources>)

- Upload and manage downloadable resource files (worksheets, guides) shared across the network.
- Download / delete files.

3.6 Leaderboard (</admin/leaderboard>)

- Top-performing students across all franchises.
- **Talking point:** "Drives healthy competition network-wide."

3.7 Competitions (</admin/competitions>) & Practice Papers (</admin/competition-papers>)

- Create and manage competitions and the practice papers tied to them.
- This is what feeds the **External (competition-only) portal**.

3.8 Settings (</admin/settings>)

- Global platform settings — branding/logo, academy details, etc.
- **Talking point:** "The logo you saw on the login screen is set right here."

3.9 Finance / Revenue (</admin/revenue>)

- Network revenue reporting with **PDF export**.
- **Commissions** (</admin/commissions>) — calculate franchise commissions, mark as paid, export to PDF.
- **Talking point:** "Head office sees consolidated revenue and settles franchise commissions from one place."

3.10 Audit Log (</admin/audit-log>) — top bar

- Immutable record of every significant action (who did what, when).
- Exportable.
- **Talking point:** "Full accountability — the audit log can't be edited or deleted, only appended."

3.11 Help & Guide (</admin/help>) — top bar

- Built-in guide covering all 4 portals.

3.12 Profile (/admin/profile) — top bar

- Admin's own account details and password.

4. Suggested Demo Order (≈ 10 min)

1. **Login** → land on Dashboard (the "wow" overview).
2. **Dashboard** — KPIs + charts + franchise table.
3. **Franchises** → Approval Queue (show onboarding a branch).
4. **Question Bank** → Audio Generator (the standout feature).
5. **Competitions** → tie to the External portal story.
6. **Finance / Commissions** — the money story.
7. **Audit Log** — close on security & accountability.

5. Key Messages to Land

- **One platform, four roles** — Admin controls the network; franchises, students, and competitors each get a tailored portal.
- **Centralized curriculum** — questions, levels, and resources are managed once and shared everywhere.
- **Built-in revenue & commission tracking** — no spreadsheets.
- **Security first** — rate-limited logins, immutable audit trail, role-based access, exam-integrity tracking.
- **Multi-tenant by design** — each franchise sees only its own data automatically.

6. Q&A — Likely Client Questions

Question	Answer
Can a franchise see other franchises' data?	No — data is auto-filtered per tenant. They only see their own.
Where do students take exams?	In the Student portal; integrity data (IP, device, tab-switches) is logged per attempt.
Can we change branding?	Yes — logo and academy details in Settings , reflected across all portals.
Is there attendance tracking?	Not in scope — the platform focuses on curriculum, exams, competitions, and finance.
How are franchises added?	Application → Approval Queue → approve (auto-creates their login).
Can we export reports?	Yes — Dashboard CSV, Revenue PDF, Commissions PDF, Audit Log export.

Tech: Laravel 12 · PHP 8.3 · MySQL 8.4 · Tailwind v4 · Alpine.js. Deployed on Hostinger via GitHub Actions.
