

Apex Brains Academy — Client Questions & Clarifications

For: Client meeting — Admin & Franchise portals

Purpose: Resolve open decisions, gather integration details, and confirm business rules before we proceed to the Student portal.

How to use: Lead with Section A (decisions that change the build) and Section B (details only the client can provide); run Section C verbally as quick confirmations.

A. Decisions That Change What We Build

These change scope or behaviour — we need answers to proceed.

#	Question	Why it matters	Client answer
1	Commission basis — calculate franchise commission on expected revenue (students × fee) or only on collected payments ?	Drives Admin → Commissions & Revenue figures. We currently use an expected-revenue fallback; "collected only" means we revert it.	
2	Online payment gateway for parents? Today the franchise manually records payments (cash / UPI / cheque). Do parents need to pay online with auto-reconciliation?	Manual recording vs. a live gateway (e.g. Razorpay / PayU) is a major scope difference.	
3	Bulk WhatsApp / SMS delivery — do they want real delivery ? Today messages are logged, not sent . If yes, which provider (WhatsApp Business API, MSG91, Twilio...)?	Notification Center & fee reminders. Needs a paid gateway + credentials.	
4	Promotion criteria — is passing the level exam the only condition to promote a student, or also teacher approval / minimum duration? Confirm no attendance tracking is needed.	Drives the Promotions flow; attendance is intentionally out of scope — worth validating.	
5	Sub-users per branch — does a franchise need multiple logins with different access (e.g. receptionist = fees only, teacher = Class Practice only)? Today it is one franchise-admin login per branch .	Roles & permissions scope.	

B. Integrations & Details We Need From the Client

Things only the client can provide.

#	Item	Needed for	Client answer
6	Legal / tax details — registered entity name, GSTIN , address, and whether receipts must show a GST / tax breakup . (Receipts currently show "ISO 9001:2015," no tax line.)	Fee receipts & certificates (client-facing / financial).	
7	Transactional email (SMTP) — provider + credentials. Password-reset email is currently blocked without this.	Self-service password reset, email notifications.	
8	Certificate signatory — name / designation + a signature image ; confirm the final high-res logo is uploaded.	Certificate & receipt branding.	
9	Fee structure — per-level monthly fee amounts , billing cycle / due date, and policy on late fees / penalties and partial payments .	Fees module accuracy (we support partial / overdue but need real numbers & policy).	

C. Business-Rule Confirmations (Quick Yes / No)

Fast confirmations — these match how the system is currently built.

Topic	To confirm	Answer
Content ownership	Question Bank, Practice Papers, Competition Papers & Exams are head-office authored ; the franchise monitors exam results only (no branch-level exam creation).	
Data isolation	A franchise must never see another branch's students, fees, or reports.	
Curriculum	Confirm the number of levels (we use up to 14) and their names.	
Class Practice audio	Is browser text-to-speech acceptable for audio dictation, or do they want recorded audio / a specific voice or language ?	
Competitions	How do external (competition-only) students compete — a timed online exam in the portal, or offline with results entered later? And who collects the competition fee ?	

Note: external-student online competition exam-taking is currently a planned follow-up — the answer to the Competitions row decides whether we build it.

Priority for the Meeting

1. **Section A** — unblocks the most work (scope-changing decisions).
2. **Section B** — gather credentials & details only the client has.
3. **Section C** — quick verbal confirmations.

Apex Brains Academy — internal reference for the client meeting (Admin & Franchise portals).
